

Rahul Raj

Software Development Engineer | Full Stack Developer

Faridabad, Haryana | rr7308241@gmail.com | +91-9625-811-730 | LinkedIn | GitHub

SUMMARY

Final-year B.Tech (AI & Data Science) student at **GTBIT** with a **CGPA of 8.42**, focused on developing foundational skills across the **full software development lifecycle**. Gaining hands-on experience in **building web applications**, **integrating AI services**, and applying core Computer Science principles including **DSA, DBMS, and OOPs**. A proactive learner with experience in **frontend interfaces** and **server-side logic**, seeking an **entry-level SDE role** to contribute to scalable tech solutions.

TECHNICAL SKILLS

Language & Frameworks: JavaScript (ES6+), Node.js, Express.js, MongoDB (NoSQL), Mongoose, React.js, Redux.
Web Technologies: HTML5, CSS3, Tailwind CSS, Bootstrap, RESTful APIs, JSON, Framer Motion.
CS Fundamentals: Data Structures in JS, OOPs, DBMS.
Tools & AI: Git/GitHub, Postman, VS Code, Vercel/Render, Google Gemini API, Generative AI Tools.

EXPERIENCE

Frontend Developer Intern | LOOPINtechies - Noida, Uttar Pradesh Aug, 2025 – Oct, 2025

- Independently built interactive web prototypes using **HTML5, CSS3, Bootstrap and JavaScript**.
- Consumed third-party **RESTful APIs** to bind real-time data using **Fetch & Async/Await**.
- Handled **API Loading States & Error Handling** to prevent UI crashes.

PROJECTS

AI Powered Code Reviewer | React.js, Node.js, Google Gemini API, Tailwind CSS | Link Jan, 2026 - Present

- Engineered a real-time analyzer using **Google Gemini API** and **Node.js** for secure server-side key management.
- Developed a responsive **Dark Mode UI** using **Tailwind CSS**, optimizing API latency via **Async/Await** patterns.
- Current Scope:** Integrating **MongoDB** to persist data, enabling a "History Feature" for saving past code reviews.

Job Application Tracker | React.js, Redux, TailwindCSS | Link Jan, 2026 – Present

- Core Architecture:** Built a secure, validated UI using **React Router** and **Zod**, managing global state via **Redux Toolkit** and **LocalStorage** to simulate functional CRUD.
- Future Roadmap:** Actively evolving into a **Full-Stack Intelligent System** by integrating **Node.js/MongoDB** for persistent storage, implementing **Google Gemini AI** for "Smart Resume Analysis," and deploying **Recharts.js** to visualize application trends.

Therapy site UI | Next.js, Tailwind CSS v4, Lucide Icons | Link Feb, 2026

- Responsive UI:** Built a high-performance landing page using **Next.js App Router** and **Tailwind CSS**.
- Interactions:** Engineered a custom **Morphing Mobile Menu** and arch-shaped layouts.
- Architecture:** Developed modular React components (Hero, Navbar) for clean, scalable code.

EDUCATION

Bachelor of Technology (B.Tech) AI & Data Science | Guru Tegh Bahadur Institute of Technology (GTBIT), IPU University

- CGPA:** 8.42/10
- Relevant Coursework:** DSA, OOPs, OS, DBMS, CN, SE, AI Fundamentals, Web Engineering.

Class XII (CBSE) | Carmel Convent School | 88% (PCM + IP)

Class X (CBSE) | Carmel Convent School | 93%

ACHIEVEMENTS

Vega Workshop — RFID FASTag System Development - New Delhi, India 2024

- Team Lead:** Led the development of a hardware-integrated **RFID FASTag System** using **Aerise boards** for seamless detection.

The Web Developer Bootcamp (Udemy - Certificate) | Link 2025

- Capstone Project:** Developed '**YelpCamp**', a full-stack marketplace using **Node.js/Express**, **RESTful APIs**, integrating **Passport.js Auth**, **Cloudinary** storage, and **MapTiler**. | Link
